SigLite Slim 1x5
T-S461 Series

The Topaz® SigLite® Slim 1x5 (T-S461®) is a small, pressure-sensitive, low-cost electronic signature pad with a thin design and hinged cover to protect the unit during transport. It features all the high quality biometric and forensic capture techniques of a SignatureGem® 1x5 signature pad but with a touchpad and stylus in place of the active electromagnetic pen and sensor, making it both space-saving and cost-efficient.

The touchpad sensor reads the digital, binary pressure of the stylus tip and transmits signature data to the computer at high speed for an easy, accurate electronic signature.

Key Features:

- Replaceable pad overlay

- Thin design and hinged cover

- Lower-cost, pressure-sensitive technology

- Signature seen on the computer screen only
