

HID® ArcID™ Mobile

Rapid ID Solution

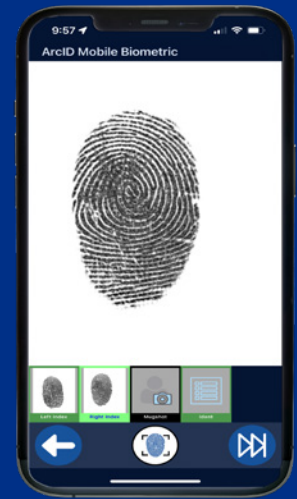

HID ArcID Mobile is a mobile app designed to run on an Android™ phone to perform rapid or fast identification (ID) for law enforcement. The software can be paired with a mobile fingerprint reader (HID NOMAD™ 30 Pocket Reader) and run on existing mobile phones that law enforcement officers already have and use.

Officers use the app to capture fingers with the mobile fingerprint reader and optional biographic data. The app then formats the data into an EFT file and submits it to a database for response. All data is submitted for

a check against a criminal Automated Fingerprint Identification System/ Automated Biometric Identification System (AFIS/ABIS) and responses are returned directly to the app. The app can be used together with HID Commander software to centrally manage a fleet of phones as a part of rapid or fast identification.

FEATURES

- User interface for one-handed operation
- Biometric and biographic data collection
- Easy-to-use workflows that guide end users through each activity
- Transaction history
- Hit/No-hit status alert
- Real-time transaction status
- Full activity logging on device
- GPS tracking
- Criminal Justice Information Services (CJIS) compliant

KEY BENEFITS:

- **Low Cost of Ownership** — The app can be easily downloaded to existing mobile phones and uses existing secure communications, removing the need to buy expensive dedicated devices to perform rapid ID
- **Fast Deployment** — Unlike standardized software, ArcID Mobile is built for customization and is easily deployed
- **Large Scale Usage** — Low cost and integration with the NOMAD 30 Pocket Reader make it easier to put the solution into the hands of more officers
- **Easy Adoption** — The solution simply adds an easy-to-use app to the officer's mobile phone, eliminating the need to learn a completely new device

HID ArcID Mobile

APPLICATION:

Law Enforcement: A rapid ID solution to be used by officers to quickly identify individuals in the field or in offices, where mobility is important.

	HID ArcID Mobile
OS Support	Android-enabled phones running Android OS 12 or later
Hardware Options	HID NOMAD 30 Pocket Reader required

Data subject to change without notice.
