

Asure ID Exchange

Card Personalization Software

Asure ID Exchange is an ideal solution for organizations that need intuitive card design and robust data management tools for advanced card personalization. It features powerful integration, enrollment and encoding modules that provide fast, seamless connectivity to existing database systems. The built-in iDIRECTOR encoding and management module further streamlines smart card development by allowing both graphical and electronic personalization in a single, unified process.

PRODUCTIVITY REDEFINED

Asure ID transforms the way ID card personalization software looks, feels and performs. With a user-friendly interface and intuitive workflows, designing ID card templates and entering data has never been easier. Everything you need — from design tools to database access — is presented in a crisp, clean workspace that lets users seamlessly move from data entry to design to printing and reporting.

EFFORTLESS, EVERYDAY USE

Routine tasks are streamlined to save time and reduce complexity. Whether you're capturing or uploading a photo, voiding a card or adjusting the print counter, it all happens in just a few clicks. Card data fields can be populated directly from the built-in Microsoft® Access® database or Live Link™ to external database sources. These and other frequently used features are always at your fingertips — thanks to the Microsoft ribbon-style toolbar.

SMART, INTUITIVE AND READY WHEN YOU ARE

Asure ID enhances efficiency by automatically loading the last-used template and report at start-up. It also offers advanced user-defined privileges, allowing administrators to control access to specific modules and templates. To find what you need in a hurry, you can perform a **Quick Filter** wildcard search on any field in the database. **Global Find** extends this convenience across all linked databases and templates.

CHOOSE YOUR SOURCE

Easily print ID cards using records from Asure ID's internal database, connecting directly to a local Microsoft database with Live Link or utilizing the import/export wizard to import record data from Microsoft Excel®.

Moreover, Asure ID Exchange expands database connectivity and networking for enterprise-class card issuance with support for ODBC import, Oracle®, MySQL, LDAP and Microsoft SQL Server.

CUSTOMIZED REPORTING SECURELY DELIVERED

In addition to a range of ready-to-use reports, Asure ID Exchange makes it easy to filter, sort and group data for customized reporting. Creating and saving personalized reports is straightforward, and configurable reporting privileges — along with application-wide password protection — help safeguard your ID data.

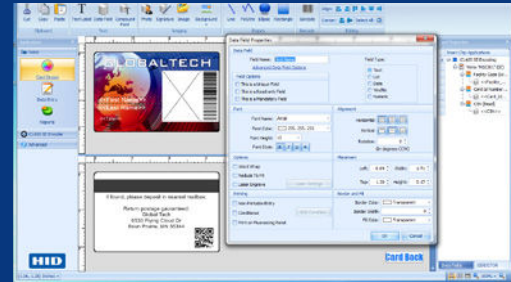

STREAMLINED SMART CARD DEPLOYMENT WITH IDIRECTOR

Asure ID Exchange's iDIRECTOR encoding and management module simplifies and enhances smart card development and deployment. iDIRECTOR efficiently manages card memory, loads multiple smart card applications — such as time and attendance — and performs graphical personalization in a single, seamless process.

With support for the iCLASS SE open encoder platform, iDIRECTOR enables end-to-end security, control and flexibility for physical access control system (PACS) credentials. For example, when used with a FARGO card printer featuring an embedded iCLASS SE encoder, you can create, encode (read/write) and manage PACS credentials entirely on-site — streamlining issuance, inventory and ordering workflows.

In addition to compatibility with iCLASS Seos, iCLASS SE and HID PROX, iDIRECTOR also supports a wide range of other card types, offering maximum versatility for your credentialing needs.

Asure ID isn't just software. It's a smarter, faster way to get the job done.

KEY FEATURES:

- **iDIRECTOR encoding and management module** — Streamline smart card development with a single, unified process
- **Robust reporting suite** — Filter, sort and group data to build custom reports
- **Live Link real-time data exchange** — Quickly and easily print card data from external databases such as HR, security or ERP systems
- **Intuitive interface** — Enjoy a streamlined, user-friendly interface that simplifies photo ID card design and data entry
- **Tabbed navigation** — Effectively multitask and effortlessly switch between card design and data entry — managing each independently
- **Pop-out control palettes** — Declutter the workspace by hiding colors and attributes until they're needed using pop-out control palettes

Asure ID Exchange

ASURE ID MEETS THE CARD APPLICATION NEEDS OF:

- Large Corporations
- National ID Programs
- Government/ Military
- State & Local Government
- Healthcare
- Education
- Medium Businesses

PART OF A COMPLETE SOLUTION

Asure ID is a key component of a fully integrated HID ecosystem for secure ID issuance, management and authentication. Partner with your HID dealer to create a customized solution using trusted HID technologies, including:

- FARGO ID card printers/ encoders
- Cards, ribbons, films and overlaminates
- HID contact and contactless card readers

RECOMMENDED MINIMUM SYSTEM REQUIREMENTS

- 1 GHz or faster processor
- 1 GB RAM
- 1 GB available hard disk space
